

ABiL partnership

The ABiL partnership combines the experienced program management expertise of IHRC with the bioinformatics leadership of Georgia Institute of Technology. Jointly, the ABiL team has over 50 years of bioinformatics experience.

The ABiL partnership combines the talents of two experienced entities:

Georgia Institute of Technology

- o Demonstrated success in the development of cutting edge bioinformatics solutions
- o Leading research institute with over 15 years of experience in providing bioinformatics training at domestic and international levels
- o Powerful clusters with Big Data and High Performance Computing capabilities

IHRC

- o Extensive knowledge of the public health mission and intricate familiarity with the operations of government entities
- o Effective project management and client engagement from project inception to completion to ensure success and mitigation of risks
- o Providing bioinformatics expertise and advanced molecular detection solutions to support the CDC's mission since 2011

ABiL offers an extensive service portfolio
